PROFESSIONAL EXPERIENCE

Nextiva

Feb 2026 - Present

Scottsdale, AZ, *Growth Marketing Intern*

- Monitored & Analyzed marketing metrics using Google Analytics and CRM tools, preparing weekly reports for leadership to track campaign ROI and identify growth opportunities.
- Conducted market analysis and competitor research to identify high-intent keywords, contributing to an SEO-driven content strategy that improved organic search visibility.
- Designed & Executed A/B tests on landing pages and creative assets, leading to a measurable increase in conversion rates and lower cost-per-acquisition (CPA).

Adobe

Sep 2025 - Present

Remote, *Student Ambassador*

- Represent Adobe across university communities by organizing workshops, interactive sessions, and digital campaigns that promote creativity, design thinking, and innovation using Adobe Express, Illustrator, and Creative Cloud tools.
- Collaborate with the Adobe Education team to design and deliver hands-on sessions tailored to student needs, helping over 200 participants develop digital storytelling and visual communication skills through project-based learning.
- Gather and analyze participant feedback through post-event surveys and engagement analytics to refine outreach strategies, resulting in a 35% increase in student engagement and sustained Creative Cloud adoption across campus.

Association for Computing Machinery, Arizona State University

Sep 2025 - Present

Remote, *Industry Intern*

- Partner with industry mentors and ACM leadership to develop and deliver technical workshops, resume sessions, and coding challenges that bridge the gap between academic learning and real-world technical application.
- Designed internal automation systems using Python and Google Sheets API to manage event registrations, attendance, and follow-ups, reducing manual data handling time by 50% and improving communication accuracy across 400+ participants.
- Supported strategic collaborations with recruiters and technology firms to organize career development initiatives, including mock interviews and technical networking sessions, expanding member participation and employer engagement.

Learning Enterprise, Arizona State University

Jul 2025 - Present

Remote, *ULC Grader & Finance/Economics Teaching Fellow*

- Evaluated and graded over 100 student assignments each semester with detailed feedback and accuracy, enhancing conceptual understanding of financial modeling, investment analysis, and economic decision-making frameworks.
- Conducted data-driven analysis on student performance trends to identify struggling learners, coordinating targeted tutoring sessions that improved retention rates and overall academic outcomes across multiple cohorts.
- Collaborated with faculty to refine assessment rubrics and integrate applied learning examples, strengthening curriculum effectiveness and improving comprehension of complex financial and economic principles in real-world contexts.

Global Launch, Arizona State University

Jun 2025 - Oct 2025

Tempe, AZ, *Business Operations Specialist*

- Processed payroll adjustments and HRIS data updates across multiple departments, ensuring compliance with institutional standards and maintaining accurate records for compensation, reimbursements, and budget allocations.
- Managed the corporate card program, overseeing card issuance, expense validation, and monthly reconciliations while improving data transparency and documentation quality during internal financial audits.
- Automated recurring expense-tracking templates using Excel macros, optimizing operational reporting efficiency by 30% and reducing manual data-entry errors in monthly financial statement preparation.

Sun Devil Fitness Complex, Arizona State University

Jun 2025 - Aug 2025

Tempe, AZ, *Membership Services Supervisor*

- Supervised 10+ student employees handling membership sales, billing, and customer relations for 1,000+ daily users, ensuring efficient front-desk operations and consistent adherence to university service standards and safety protocols.
- Implemented workflow enhancements for renewals and check-ins by integrating automated tracking systems, reducing transaction errors and average wait times by 15%, enhancing member experience and staff productivity simultaneously.
- Delivered training programs covering communication, policy enforcement, and technical system usage, raising employee confidence levels and ensuring high-quality service delivery throughout all operational shifts and student engagement touchpoints.

ASU Gammage, Arizona State University

Feb 2025 - May 2025

Tempe, AZ, *Security Aide*

- Secured operations for 2,000+ guests per event by coordinating access control, emergency preparedness, and safety compliance, ensuring smooth performance execution under high-pressure, high-visibility circumstances with zero incident occurrences.
- Collaborated with facility management, ushers, and law enforcement officials to maintain orderly crowd movement, prevent bottlenecks, and guarantee compliance with institutional and state-mandated public safety regulations during large-scale events.
- Delivered prompt assistance to guests, demonstrating professionalism and conflict-resolution skills while managing security screenings, incident reporting, and lost property documentation, enhancing overall audience experience and operational reliability.

W. P. Carey School of Business, Arizona State University

Nov 2024 - Jan 2025

Tempe, AZ, *Information Technology Support Specialist*

- Provided Tier-1 IT assistance to faculty and staff, troubleshooting network, hardware, and software issues across 300+ devices, minimizing downtime and maintaining productivity standards for university business operations.
- Automated password resets, onboarding workflows, and device provisioning using Python and PowerShell, reducing manual processing by 40% and increasing ticket resolution efficiency within ServiceNow-based IT service management system.
- Partnered with senior administrators to install system upgrades, apply security patches, and document process improvements, bolstering reliability, cybersecurity posture, and continuous improvement initiatives within W. P. Carey's technology infrastructure.

Sun Devil Athletics, Arizona State University

Oct 2023 - Nov 2024

Tempe, AZ, *Technology Assistant*

- Maintained and repaired 150+ IT and AV systems supporting athletics programs, achieving 98% uptime while enabling uninterrupted technology performance during events, training sessions, and administrative operations.
- Conducted user training sessions and developed quick-reference documentation, empowering 60+ staff members to resolve minor technical issues independently, improving service response time and overall operational efficiency.
- Collaborated with senior IT staff to identify recurring issues, implement network upgrades, and streamline troubleshooting workflows, enhancing overall reliability and system scalability for athletics technology infrastructure.

University Housing, Arizona State University

Oct 2023 - Nov 2023

Tempe, AZ, *Desk Assistant*

- Delivered front-line support to residents, addressing access requests, maintenance tickets, and general inquiries with accuracy and professionalism, ensuring consistent service quality and operational continuity across residence halls.
- Managed digital and physical key inventory, maintaining detailed logs to ensure accountability, security, and efficient coordination between housing, maintenance, and safety departments for all resident requests.
- Assisted in planning and executing community engagement programs, facilitating events that fostered collaboration, inclusion, and student well-being, while improving communication channels between housing staff and residents.

Changemaker Central, Arizona State University

Sep 2023 - Nov 2023

Tempe, AZ, *Desk Assistant*

- Oversaw operations of student innovation spaces, supporting 300+ users through event setup, AV configuration, and resource coordination, ensuring seamless functionality and accessibility across all equipment and collaborative environments.
- Diagnosed and resolved equipment and connectivity issues, coordinating maintenance schedules and communicating with IT staff to maintain optimal performance and minimize event disruption.
- Engaged directly with student organizations to facilitate workshops and creative initiatives, fostering collaboration, leadership development, and entrepreneurship within Arizona State University's innovation community.

Tizzy Cloud Computing Pvt. Ltd.

Nov 2020 - Nov 2020

Mumbai, India, *Intern*

- Assisted senior developers in testing and documenting cloud-based deployment pipelines, validating infrastructure performance, and troubleshooting errors to ensure scalable, reliable, and secure client applications.
- Conducted log analysis, identified inefficiencies in database queries, and suggested optimization strategies that improved backend data handling performance and reduced load times across cloud-hosted environments.
- Supported workflow documentation and code versioning practices using Git, contributing to improved development collaboration and long-term project maintainability for internal engineering teams.

Mukesoft Consultants

May 2020 - May 2020

Mumbai, India, *Intern*

- Developed front-end web components using HTML, CSS, and JavaScript, improving visual consistency and responsiveness for client-facing applications deployed across multiple browsers and devices.
- Collaborated with developers to test integration modules, debug database inconsistencies, and verify functional accuracy across interconnected systems within an agile sprint workflow.
- Authored internal documentation detailing UI/UX design improvements and testing methodologies, strengthening future onboarding processes and accelerating development cycles for subsequent project iterations.

EDUCATION

Bachelor of Science in Computer Science, Minor in Economics, Arizona State University

May 2026

Major GPA: 3.81/4.0 (Dean's List)

Biocomputing Scholar

PROJECTS

Wheel Strategy Options

Mar 2025 - May 2025

- Engineered a scalable Next.js and TypeScript architecture integrating Node.js, Express, and PostgreSQL, ingesting 570K+ option records hourly while maintaining <500 ms response latency using optimized caching and load-balancing pipelines.
- Deployed real-time data synchronization across REST APIs and WebSockets, leveraging Redis for in-memory queuing and distributed caching, enabling 1,200 concurrent users with consistent sub-second data visualization and computational accuracy.

Sea Level Predictor

Apr 2025 - May 2025

- Developed ARIMA and LSTM hybrid forecasting models trained on 50-year NOAA datasets, optimizing hyperparameters through Bayesian search to achieve 92% back-test accuracy with automated daily retraining and deployment pipelines.

- Implemented continuous data ingestion using Streamlit and Pandas ETL workflows, building an interactive dashboard that delivered live visualizations and statistical confidence intervals to 300+ concurrent users without manual intervention.

Medical Data Visualization

Apr 2025 - May 2025

- Built an R Shiny web application integrating ggplot2, plotly, and dplyr for multi-dimensional medical outcome exploration, enabling clinicians to filter demographic parameters and generate automated treatment analytics dashboards.
- Automated end-to-end reporting pipelines through R Markdown and cron-triggered data refreshes, reducing manual processing by 70% while maintaining synchronized PostgreSQL datasets and reproducible visualization outputs across hospital departments.

Mega Shop

Feb 2025 - Mar 2025

- Architected a microservices-based e-commerce backend using Express.js, MongoDB, and RabbitMQ for asynchronous inventory updates, achieving consistent transaction integrity and 99.9% uptime under simulated 10K concurrent purchase requests.
- Deployed CI/CD pipelines with Docker, Jenkins, and AWS Elastic Beanstalk, automating build validation, containerized testing, and zero-downtime deployment to production with comprehensive logging via ELK stack monitoring.

Page View Time Series Visualizer

Jan 2025 - Feb 2025

- Designed a Python data-processing pipeline with Pandas and Matplotlib for Wikimedia traffic analytics, aggregating terabyte-scale logs into normalized datasets and producing efficient rolling averages through vectorized operations.
- Implemented automated forecasting visualizations combining ARIMA and Prophet models, enabling granular anomaly detection with parameter tuning via scikit-learn GridSearchCV and automated regression error tracking stored in SQLite.

Demographic Data Analyzer

Dec 2024 - Jan 2025

- Engineered a Pandas-based ETL framework to clean, aggregate, and normalize global census datasets exceeding 100MB, implementing optimized NumPy vectorization for efficient columnar transformations and statistical feature extractions.
- Automated correlation and regression analysis workflows using Seaborn and scikit-learn, generating high-resolution demographic heatmaps and linear model summaries dynamically refreshed through parameterized Jupyter notebooks integrated with Matplotlib.

Mean Variance Standard Deviation Calculator

Nov 2024 - Dec 2024

- Developed a NumPy-driven computational module performing advanced matrix operations, variance decomposition, and multi-dimensional statistical computations, enabling real-time numeric aggregation and performance benchmarking for large structured arrays.
- Integrated exception handling and validation routines, achieving deterministic outputs under randomized test conditions while ensuring floating-point precision and optimal algorithmic complexity through vectorized operations within Python's numerical stack.

Scientific Computing with Python

Oct 2024 - Nov 2024

- Implemented modular numerical algorithms for calculus, linear algebra, and probability using NumPy, SciPy, and SymPy, optimizing symbolic computation speed through memoization and efficient matrix decomposition techniques.
- Benchmarked computational performance across various Python interpreters, leveraging PyPy JIT compilation and Numba acceleration, achieving a 65% runtime improvement on iterative simulations requiring intensive arithmetic operations.

Jirani Offline Digital Library

Jun 2024 - Aug 2024

- Developed an offline-first library management system using Flask and SQLite, enabling low-connectivity access through progressive web app caching, JWT-based authentication, and RESTful resource synchronization.
- Integrated service workers and client-side encryption with IndexedDB, allowing secure offline data retrieval, background synchronization, and fault-tolerant transactional consistency across constrained network environments.

RESEARCH

Correctness, Security, and Performance of IPv4 Selection Under Bursty Traffic Conditions - Undergraduate Researcher

- Evaluated and improved network resilience through simulation models; findings directly led to immediate patching of high-risk vulnerabilities and the adoption of more robust IPv4 handling practices, improving security by 8%.

NEWSLETTER

EconBites: Quick Insights - Founder & Writer (Daily)

- Founded and managed a daily economics newsletter reaching 200+ subscribers, leveraging automation tools to streamline content scheduling, distribution, and engagement tracking while consistently producing concise, high-quality insights that generated 3,500+ impressions and 400+ article views.

SKILLS

Technical: Python, R, SQL, PowerShell, Bash, JavaScript, TypeScript, HTML5, CSS3, React, Next.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Flask, Streamlit, R Shiny, Docker, Kubernetes, Jenkins, Google Cloud Platform, PostgreSQL, MongoDB, SQLite, Redis, RabbitMQ, NumPy, Pandas, Matplotlib, Seaborn, SymPy, Git, GitHub, REST APIs, WebSockets, CI/CD pipelines, ELK Stack, ServiceNow, Jira, Active Directory, VMware, Power BI, Stata, QGIS

Methods: Workflow automation, microservices architecture, data pipelines (ETL/ELT), machine learning model development, statistical modeling, data visualization, regression analysis, anomaly detection, performance tuning, fault detection, system monitoring, root cause analysis, predictive analytics, cloud deployment, distributed computing, cache optimization, continuous integration, continuous delivery, containerization, version control, web development lifecycle, ITIL service management, incident response, change management, process optimization, user experience improvement, and cross-functional collaboration
